WHAT IS CLAIMED IS:

1.   An image communication apparatus capable of communicating with another image communication apparatus in a server-client system, comprising:

an image display device which displays a recorded image;

a selection device which selects an image to be transmitted to another image communication apparatus from among images displayed on the image display device; and

a transmission device which transmits to another image communication apparatus the image selected by the selection device when a request to send the image is received from one or more image communication apparatuses at a client side of another image communication apparatus.

2.   The image communication apparatus according to claim 1, wherein the image communication apparatus comprises a digital camera.

3.   An image communication apparatus capable of communicating with another image communication apparatus in a server-client system, comprising:

a request transmission device capable of transmitting a request to send an image to an image communication apparatus at a server side when an image to be transmitted is selected from among images displayed on the image communication apparatus at the server side; and

an instruction device which instructs the request to send the image to be transmitted to the image communication apparatus at the server side.

4.   The image communication apparatus according to claim 3, wherein the image communication apparatus comprises a digital camera.

5.   The image communication apparatus according to claim 4, wherein the instruction device comprises a device which operates using a release button of the digital camera.

6.   An image communicating method capable of communicating an image in a server-client system, comprising the steps of:

displaying an image at a server side;

selecting at the server side an image to be transmitted to a client side from among displayed images;

instructing at the client side a request to send the image to the server side;

transmitting from the client side to the server side the request to send the image from the server side to the client side; and

transmitting from the server side to the client side the selected image when the server side receives from the client side the request to send the image.
